# Qusai Fawzi Awwad

## Supply Chain | CSCA | Planning Engineer & Business Development | ERP Systems

**+962 790 911 971 | qusai.fawzi.awwad1@gmail.com | Portfolio | Zarqa,JO | Qusai's LinkedIn Profile**

## Professional Summary

**Industrial Engineer and Certified Supply Chain Analyst (CSCA)** focused on turning operational complexity into practical, structured workflows across production planning, demand and inventory analysis, **SAP PP/MM**, **Odoo ERP**, and industrial project planning. **Skilled** in developing business models, SOPs, ISO-based processes, and ERP workflows that support operational efficiency. **Experienced** in leading production teams of approximately 60 employees and building Python-based planning tools to improve decision-making and planning accuracy.

## Experience

**Planning Engineer & Business Development, UNIVAL-JO (Trusted Union), Amman** **Sep 2026 – Present**

- **Developed** business models and project plans based on production capacity, market requirements, investment needs, and operational considerations.
- **Planned** and followed up on current projects by defining timelines, monitoring progress, and identifying delays and corrective actions.
- **Managed** factory registration and licensing procedures through Saudi government entities and e-services platforms, tracking application statuses, required documentation, and timely approvals.
- **Coordinated** logistics activities, including shipment planning, transportation, customs clearance, HS Codes, and regulatory requirements, alongside suppliers, contractors, consultants, and implementation partners.
- **Developed** and implemented SOPs, supported ISO 9001 and ISO 45001 application, and followed up on Odoo ERP workflows.

**Production & Supply Chain Engineer, Hammoudeh-Group (Al Mafraq Plastic), Mafraq** **Mar 2025 – Sep 2026**

- **Led** and followed up on a multi-level production team of approximately 60 employees, including shift supervisors, machine operators, and production workers.
- **Analyzed** production, inventory, and material data to support production planning and operational decision-making.
- **Delivered** the production-side SAP PP/MM setup, from material coding and BOMs to production orders, material issuance, and custom reports.
- **Developed** production plans based on Make-to-Order requirements while monitoring material availability, production capacity, and customer demand.
- **Implemented** ISO 9001 requirements for the Production Department, developing 7 SAP-based procedures.
- **Coordinated** with warehouse and management teams to improve material flow, reduce waste, and prevent material shortages.

**Intern, Mudieb Haddad & Sons Company (Mr. Chips), Zarqa** **Jul 2024 - Aug 2024**

- **Managed** the production line, ensuring efficient operation, improvement, and adherence to safety standards.
- **Calculated** daily production, ensuring required quantities are met and maintaining operation of production lines.

## Professional Certifications

- **Certified Supply Chain Analyst (CSCA)** | International Supply Chain Education Alliance (ISCEA) | Jul 2024
- **Career Essentials in Project Management** | Microsoft & LinkedIn | Nov 2024

## Projects

**"SAP Production System Setup – SAP PP/MM, Hammoudeh-Group"**

- **Led** the production-side SAP setup: standardized material coding and master data, BOMs with consumption and waste logic, and production order and material issuance workflows.
- **Improved** material traceability, planning accuracy, and inventory visibility, working with the external implementation partner through validation.

**"Factory Establishment & Odoo ERP Setup – Al Kharj, Saudi Arabia"**

- **Coordinated** a cleanroom sandwich panel factory: licensing, line layout, space planning, BOMs, and Odoo ERP (Sales, Purchase, Inventory, Manufacturing, Accounting).

**"Production Planning Recommendation Model – Python & Streamlit" | GitHub**

- **Developed** a weekly production planning model using inventory balances and monthly demand data.
- **Calculated** stock coverage, classified production priorities, and generated recommended production quantities by product and machine.
- **Added** configurable business rules, coverage-based alerts, Excel and PDF reports, and a management dashboard to support planning decisions.

**"Demand & Inventory Planning System – Python, Pandas, NumPy & Streamlit" | GitHub**

- **Developed** a planning system combining SKU-level demand forecasting, inventory analysis, and branch-level planning.
- **Applied** rolling backtesting to select suitable forecasting methods and handled intermittent and lumpy demand patterns.
- **Calculated** safety stock, reorder point, days of supply, order-up-to level, and suggested order quantity.
- **Classified** SKUs into Order, Review, or Hold and generated purchase order proposals and overstock report.

## Achievements

- **ISO 9001 Process Standardization** | Standardized the Production Department's processes with SAP-based procedures aligned with ISO 9001 requirements, strengthening process control and traceability.
- **ISO-Based Process Development** | Developed SOPs and supported the application of ISO 9001 and ISO 45001 requirements at UNIVAL-JO, including applicable ERP workflow integration.
- **1st Place – Supply Chain Hackathon** | Strategic decision-making in The Fresh Connection simulation.
- **Global Finalist – Global Student Challenge** | The Fresh Connection simulation.
- **3rd Place – ISCEA Global Supply Chain Competition** | Supply chain strategy development and risk mitigation.

## Education

**The Hashemite University, Zarqa, Jordan** **Oct 2020 - Feb 2025**

- Bachelor's degree in **Industrial Engineering** (Overall Grade: **Very Good).**

## Technical Skills

- **Supply Chain & Production Planning** | Production planning, demand analysis, inventory planning, material availability, Make-to-Order planning, and production scheduling.
- **ERP Systems** | SAP PP/MM (production orders, material issuance, BOMs, reporting) and Odoo ERP modules.
- **ISO & Process Management** | ISO 9001 and ISO 45001 implementation, SOP development, process documentation, and workflow integration.
- **Demand & Inventory Analytics** | Forecasting, stock coverage, safety stock, reorder point, days of supply, ABC classification, and order recommendations.
- **Business Development, Licensing & Logistics** | Business models, project plans, timelines, factory licensing, government e-services, shipment planning, customs, and HS Codes.
- **Data Analytics & Reporting** | Python (Pandas, NumPy), Streamlit dashboards, Excel reports, planning recommendations, and operational reporting.
- **Manufacturing Operations** | Production line coordination, material flow, waste monitoring, production capacity, and cross-functional operations.

## Personal Skills

- **Data Accuracy & Data Validation**
- **Data-Driven Problem Solving**
- **Analytical Thinking**
- **Production Team Leadership**
- **Planning and Organization**
- **Attention to Detail**
- **Cross-Functional Collaboration**
- **Continuous Learning and Adaptability**

## Languages

- Arabic **(Native)**
- English **(Very Good)**
